

Desk Panels DPG

- a new way to adjust office desks

The challenge of standing up

We know it already. We sit down too much and move too little during a workday. It seems easy, but how do we really bring movement into the everyday of office workers?

Rise in height adjustable office desks - difficulties using them

Height adjustable desks are becoming more and more normal in modern office environments. It is no longer a piece of furniture reserved for the few. Employees are given the opportunity to be active and work ergonomically correct during the workday.

However, research shows that we do not use the desks to the fullest. Despite the best of intentions, we somehow forget to move during the day. Poor habits in the workplace dominate and we have no clue what prolonged sitting does to our body.

The LINAK® solution - we want to improve your life

Through thorough research, we have done our utmost to develop the solution of tomorrow - a solution that will make users use their height adjustable desks in a new way. We listened to the market. We made a study with end-users around the world.

We consulted experts within behavioural design. Based on this, we have developed a solution that will make users use their height adjustable desks more and in a new way.

Designed to shape behaviour

Reminders

Research proves that being to stand up during a workday results in an increased usage of the desk. Thus, reminders are integrated into three of the four Desk Panel DPGs. Via light, users are reminded to change position in intervals which are possible to change and personalise.

Intuitive

All four Desk Panel DPGs are activated by tilting the desk panel in the same direction as it is intended to drive. This means that the desk does not have any buttons and the user can drive the desk without even looking at the desk panel. Absolutely intuitive and logical.

Digital

Three of the four Desk Panel DPGs have Bluetooth® wireless technology integrated. Connect to the Desk Control™ app, and it opens a wealth of options.

Desk Panel DPG's

- the innovative desk panel series

The Desk Panel DPG is a comprehensive product programme consisting of four desk panels ranging from a simple up/down panel to advanced versions with sophisticated features.

DPG1C

DPG1M

- Up/down drive
- 2 favourite positions
- LED reminder

 **Bluetooth**

DPG1B

- Up/down drive
- 2 favourite positions
- Light strip reminder

 **Bluetooth**

Desk Control™ App

- completing the Desk Panel DPG

Connect your Desk Panel DPG to the Desk Control™ App, using Bluetooth® wireless technology.

With the Desk Control App, you can connect your LINAK® system with your iOS and Android mobile devices.

Auto-connect, motivational notifications and statistics with overview help utilise the office desk's adjustment more actively – ultimately improving work habits for the user.

Desk Control is available for iOS and Android-based phones.

Personal statistics and motivating reminders

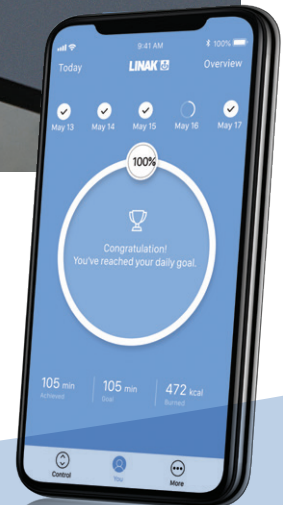

With the Desk Control App, users can check their personal sit-stand statistics and receive reminders to stand up during the day.

Set the preferred sit and stand heights and they are stored in the app. The light reminder synchronises with the settings set in the app.

Friendly reminders and statistics to show the daily achievements help the user during the workday.

Global presence

LINAK® has a well-developed sales and service organisation in Europe, the Americas, Asia and Australia. Therefore, we can assist you and your customers locally, under the global sales concept idea: Be global, act local
